

# CalCOFI ON-LINE DATA SYSTEM USER'S MANUAL

National Oceanic and Atmospheric Administration  
National Marine Fisheries Service  
Southwest Fisheries Center

The California Cooperative Oceanic Fisheries Investigations (CalCOFI) is a consortium of marine research institutions engaged in long-term studies of the pelagic ecology of the California Current. In support of these studies, systematic surveys have been conducted since 1951; approximately 50,000 plankton samples and 20,000 hydrocasts have been obtained during the course of over 300 cruises.

The CalCOFI On-Line Data System provides on-line access to the data resulting from analyses of the plankton and water samples. This system provides a researcher with a relatively easy way to explore the extent of the CalCOFI data and to extract subsets of that data. The ichthyoplankton portion of this system is an electronic edition of the data report series published by the Southwest Fisheries Center in 1987 and 1988. This report series is the authoritative and citable source of the CalCOFI ichthyoplankton data. Any researcher using this system is strongly encouraged to consult the data reports (cited in the on-line reference list) for the most complete description of these data.

## REQUIRED HARDWARE AND SIGN-ON/SIGN-OFF PROCEDURES

The CalCOFI On-line Data System is maintained in a VAX/VMS computing environment. The system currently resides on a VAX/780 computer operated by the UCSD Academic Computing Center (designated SDCC1) and accessed through the UCSD Local Area Network. For accounting purposes, any researcher desiring access to the system must have an account on SDCC1 or use a special account set up by Information Technology Services at the Southwest Fisheries Center. Once logged on SDCC1, type @CALCOFI at the \$ prompt to bring up the INTRODUCTION.

INTRODUCTION

The California Cooperative Oceanic Fisheries Investigations (CalCOFI)
Online Data System provides online access to the data resulting from
long-term studies of the pelagic ecology of the California Current.
This system provides a researcher with a relatively easy way to explore
the extent of the CalCOFI data and to extract subsets of that data.
There is an accompanying User's Manual, a hardcopy document, available
to aid your use of this system.

Please consult "Current notes and revisions" under the MAIN MENU
"Methodology" option for information on available data, estimated
computer costs, and updates to the User's Manual.

Press (RETURN) for the MAIN MENU
(RETURN) means the key for carriage return or enter.
```

Output is directed to both the terminal screen and to a computer file for subsequent processing or printing. Terminal display can be prematurely aborted without affecting the integrity of the computer file. Output file formats are described in the on-line methodology section. Screen display of 132-column tables requires VT100 terminal emulation. Screen display of plots requires Tektronix 4010/14 graphics capability. Plot files are not saved.

The system is capable of servicing one researcher at a time. If the system is in use access will be denied and the researcher will be advised to try again at a later time. The researcher signs off through the main menu. The system responds by displaying the computer charges and the names and formats of output files created during the on-line session.

For additional information contact:

CalCOFI Online Data System  
Version 1.0  
April 1988

## MAIN MENU

The main menu provides the researcher with options that describe the extent of the observations, the methods used to collect and process the samples, horizontal distributions of ichthyoplankton data, and vertical profiles of temperature, salinity and oxygen content.

```
*** CALCOFI ON-LINE DATA SYSTEM ***
                                MAIN MENU

1. STATION INDEX -- for exploring the data
2. METHODOLOGY -- for explaining the data
3. ICHTHYOPLANKTON DATA -- for extracting the data
4. HYDROCAST DATA -- for extracting the data

Select option number or Q to exit:
```

1. **STATION INDEX** is chosen to explore the extent of the data and to note the cruise numbers and geographic areas of interest. These will be required as input for data extraction.

2. **METHODOLOGY** option provides access to an on-line document that describes the ichthyoplankton sampling protocol and sorting procedures. Descriptions of the output files and an annotated list of references are also available.

3. **ICHTHYOPLANKTON DATA** option is chosen to extract counts of fish eggs and larvae. The researcher is asked to specify the desired cruises.

4. **HYDROCAST DATA** option is chosen to extract estimates of temperature, salinity and oxygen at standard depths. The researcher is asked to specify the desired cruises.

Each option from the main menu has an associated submenu. These are described on the following pages.

## 1. STATION INDEX

Station Index provides an overview of the geographic and temporal sampling density. It is intended to be used as an aid in specifying criteria for data selection.

```
*** CALCOFI ON-LINE DATA SYSTEM ***
                                STATION INDEX MENU

1. CRUISE INFORMATION BY YEAR
2. GEOGRAPHIC SAMPLING DENSITY BY CRUISE
3. TEMPORAL SAMPLING DENSITY BY AREA

Select option number or Q to return to MAIN MENU:
```

1.1 **CRUISE INFORMATION BY YEAR** option provides the beginning and ending dates of every cruise, the name of the ship(s) used, and the number of stations occupied for the year(s) specified. Typical screen output:

```
*** CALCOFI Cruises ***

Press <RETURN> for more or 0 to abort listing:

```

Those who are connected by graphic terminals can select the plot option. Typical screen output:

Press <RETURN> to clear plot from screen and return to STATION INDEX MENU.

## **2. METHODOLOGY**

Each of the Methodology options has an associated submenu to further refine a request for information. Text is displayed on the terminal screen. Any portion of the text can be written to a computer file for subsequent printing.

**2.1. CURRENT NOTES AND REVISIONS** option provides access to the latest programmer's notes, a description of the data currently available, and computer charges for typical sessions.

**2.2. OUTPUT FILE STRUCTURES** option describes the output data file formats for the eleven file types available.

**2.3. SAMPLING FREQUENCY AND GEOGRAPHIC COVERAGE** option describes the cruise frequency and geographic coverage for four eras: 1951-60, 1961-65, 1966-84, 1985-87.

**2.4. SAMPLING GEAR DESIGN** option describes the CAL1MOBL, CALBOBL, and CALVET plankton samplers and their deployment.

**2.5. SAMPLE COLLECTION, SORTING AND ARCHIVING** option describes field collection methods, sorting procedures, larval length categories, and anchovy egg stages.

**2.6. IDENTIFICATION NOTES** option describes the number of taxonomic categories used during four eras: 1950's, 1960's, 1970's and 1980's.

**2.7. STANDARDIZATION PROCEDURES** option describes the adjustment for fractional sorting and the standard haul factor.

**2.8. ANNOTATED REFERENCE LIST** option lists sampling manuals, data reports and atlases, and references on estimates of egg and larval mortality and spawning biomass.

---

### 3. ICHTHYOPLANKTON DATA

Ichthyoplankton Data extracts data from the files created from analyses of the CalCOFI plankton samples. The researcher is asked to specify the cruise(s) and, for some options, the fish species of interest.

```

*** CalCOFI ON-LINE DATA SYSTEM ***

Those who are connected by graphics terminals can display plots of selected stages of eggs. Typical screen output:

Press <RETURN> to clear plot from screen and return to ICHTHYOPLANKTON DATA MENU.

3.4. OTHER FISH EGGS AND LARVAE option will display a submenu:

```

*** CALCOPI ON-LINE DATA SYSTEM ***

OTHER FISH EGGS AND LARVAE

1. SPECIES OCCURRENCES
2. SPECIES ABUNDANCES

Select option number or 0 to return to ICHTHYOPLANKTON DATA MENU:

```

3.4.1. SPECIES OCCURRENCES option provides a list of taxonomic categories, the number of occurrences of each, and standardized counts of each for the cruise(s) specified by the researcher. Typical screen output:

```

Species Occurrences
Cruises 8406 & 8407

```

Code	Species Name	Number of Occurrences	Number of Specimens
483	Sebastes spp.	183	4921.44
301	Triphoturus senicusus	163	7404.61
031	Engraulis mordax	141	13124.81
071	Rehynghus ussachi	125	2719.64
574	Stenaster japonicus	125	14.54
260	Lampanyctus ritteri	98	820.54
093	Vinciguerria lucicola	94	4622.06
072	Lauriglossus stibius	88	843.23
242	Diogenichthys lateratus	81	1193.73
019	Sardinops sagax	77	6015.32
228	Diaphus spp.	77	4735.47
292	Stenobrachius leucospaeus	74	1256.31
299	Tarletonostoma granulata	63	1195.62
288	Protocyttus crockeri	55	343.56
925	Citharichthys stigmaceus	53	428.67
398	Helosaurus spp.	50	228.56
076	Cyclothone spp.	48	393.75

Press (RETURN) for more or 0 to abort listing:

3.4.2. SPECIES ABUNDANCES option provides specimen counts for each station occupied. The researcher is asked for the cruise(s) and taxon of interest. Consult the code list at the end of this manual when specifying desired taxonomic categories. The researcher may elect to display only positive stations, however, the computer file contains both positive and negative stations. Typical screen output (132 column format):

```

Species Abundances
Cruise & Date & Time
Line Station Date Lat Long Depth Cruise Count Date Count Date Count Date Count

Press <RETURN> for more or 0 to abort listing
  
```

Those who are connected by graphics terminals can display a plot of the total number of specimens in the selected taxonomic categories. Typical screen output:

Press <RETURN> to clear plot from screen and return to OTHER FISH EGGS AND LARVAE MENU.

#### 4. HYDROCAST DATA

Hydrocast Data provides access to data files created from analyses of water samples. These data files, originally processed by Scripps Institution of Oceanography, contain measurements of temperature, salinity and oxygen content at standard depths. The first two options allow the researcher to explore the extent of the hydrocast data; the last option is used to extract desired data.

```

*** CALCOPI ON-LINE DATA SYSTEM ***
HYDROCAST DATA MENU

1. GEOGRAPHIC SAMPLING DENSITY BY CRUISE
2. TEMPORAL SAMPLING DENSITY BY AREA
3. TEMPERATURE/SALINITY/OXYGEN PROFILES

Select option number or 0 to return to MAIN MENU:
  
```

4.1. GEOGRAPHIC SAMPLING DENSITY BY CRUISE option provides a list of hydrocasts, the equipment used and the maximum depth sampled. The researcher is asked to specify the cruise of interest. Typical screen output:

```

Hydrocast Data: Geographic Sampling Density
Cruise: 5403

 611 Cautolepis princeps  
 480 Mullidae  
 440 Priacanthidae  
 610 Scaenidae  
 609 Atractacion nobilis  
 614 Chelotrema saturnum  
 611 Cynoscion spp.  
 612 Genyonemus lineatus  
 617 Menthirhus spp.  
 618 Roncador steamsii  
 613 Seriphus politus  
 619 Umbrina roncador  
 425 Serranidae  
 435 Anthoninae  
 427 Epinephelinae  
 426 Epinephelus spp.  
 436 Grammistinae  
 430 Serraninae  
 431 Paralabrax spp.  
 605 Sparidae  
 607 Calamus brachysomus  
 490 Polynemidae  
 590 Gempylidae  
 597 Diplopinus multistriatus  
 591 Gempylus serpens  
 582 Nealotus tripes  
 580 Scombridae  
 581 Auxis spp.  
 584 Euthynnus spp.  
 587 Katsuwonus pelamis  
 571 Sarda chilensis  
 574 Scomber japonicus  
 577 Scomberomorus spp.  
 581 Thunnus albacares  
 595 Trichiuridae  
 596 Lepidopus xantusi  
 598 Trichiurus nitens  
 485 Sphyrnidae  
 486 Sphyrna argentea  
 535 Centrolophidae

536 Ichthyus lockingtoni  
 520 Nomeidae  
 522 Cubiceps spp.  
 526 Cubiceps caeruleus  
 527 Cubiceps pauciradiatus  
 521 Nomeus gronovii  
 523 Paenes spp.  
 525 Paenes pellucidus  
 524 Paenes sic  
 530 Stromateidae  
 532 Peprilus spp.  
 531 Peprilus simillimus  
 545 Tetragonuridae  
 547 Tetragonurus atlanticus  
 548 Tetragonurus cuvieri  
 615 Chiasmodontidae  
 618 Chiasmodon niger  
 835 Uranoscopidae  
 838 Astroscopus spp.  
 860 Zoarcidae

**PLEURONECTIFORMES**

915 Pleuronectiformes  
 918 Bothidae  
 917 Bothus spp.  
 918 Bothus leopardinus  
 931 Engyophrys sancti-laurentii  
 937 Monolepis spp.  
 924 Citharichthys spp.  
 921 Citharichthys fragilis  
 922 Citharichthys gilberti  
 920 Citharichthys platophrys  
 923 Citharichthys sordidus  
 925 Citharichthys stigmæus  
 926 Citharichthys xanthostigma  
 930 Cyclosetta spp.  
 928 Etropus spp.  
 933 Hippoglossina spp.  
 929 Hippoglossina stomata  
 934 Paralichthys spp.  
 932 Paralichthys californicus  
 927 Syacium ovale  
 926 Xystreurys liolepis  
 940 Pleuronectidae  
 950 Atheresthes stomias  
 961 Embasichthys bathybius  
 960 Eopsetta jordani  
 941 Glyptocephalus zachirus  
 947 Hippoglossoides elassodon  
 945 Hippoglossus stenolepis  
 942 Hypsopsetta guttulata  
 963 Inopsetta ischyra  
 962 Isopsetta isolepis  
 944 Lepidopsetta bilineata  
 943 Lyopsetta exilis  
 946 Microstomus pacificus  
 948 Parophrys vetulus  
 949 Platichthys stellatus  
 954 Pleuronichthys spp.  
 951 Pleuronichthys coenosus  
 952 Pleuronichthys decurrens  
 953 Pleuronichthys ritteri  
 955 Pleuronichthys verticalis  
 958 Psetticthys melanostictus  
 950 Reinhardtius hippoglossoides  
 965 Cynoglossidae  
 966 Symphurus spp.  
 968 Soleidae  
 969 Achirus mazatlanus

**TETRAODONTIFORMES**

415 Balistidae  
 414 Ostraciidae  
 420 Tetraodontidae  
 002 Disintegrated fish larva  
 001 Unidentified fish larva
